AFRILANG Stdlib

std/m/listzip2

Bibliothèque AFRILANG `std/m/listzip2` (niveau medium, catégorie medium). Elle expose 4 fonction(s) : zipAdd, zipMul, zi

`import "std/m/listzip2"` · `use listzip2`

- `zipAdd(a list number, b list number) ? list number`
- `zipMul(a list number, b list number) ? list number`
- `zipSub(a list number, b list number) ? list number`
- `zipMax(a list number, b list number) ? list number`

Category: medium | Tier: medium | Functions: 4

FRANCAIS

1. Vue d'ensemble

Bibliothèque AFRILANG `std/m/listzip2` (niveau medium, catégorie medium). Elle expose 4 fonction(s) : zipAdd, zipMul, zi

`import "std/m/listzip2"` · `use listzip2`

- `zipAdd(a list number, b list number) ? list number`
- `zipMul(a list number, b list number) ? list number`
- `zipSub(a list number, b list number) ? list number`
- `zipMax(a list number, b list number) ? list number`

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/listzip2"
use listzip2
```

Niveau : medium · Catégorie : Modules medium (m/)
Bibliothèques intermédiaires ? import std/m/?

3. Référence API

? zipAdd(a list number, b list number) ? list
? zipMul(a list number, b list number) ? list
? zipSub(a list number, b list number) ? list
? zipMax(a list number, b list number) ? list

4. Exemples d'utilisation

```
import "std/m/listzip2"
use listzip2

create result = zipAdd(/* args */)
say result

create result = zipMul(/* args */)
say result

create result = zipSub(/* args */)
say result

create result = zipMax(/* args */)
say result
```

5. Bonnes pratiques

? Préférez `import "std/m/listzip2"` en tête de fichier.
? Lancez `afrilang check` avant de livrer.
? Combinez avec les modules stdlib de la même catégorie.
? Voir /stdlib/ pour le source live et les démos playground.
? Signalez les problèmes sur GitHub si une export manque.

6. Annexe ? source

```
module listzip2

function zipAdd(a list number, b list number) returns list number
end

function zipMul(a list number, b list number) returns list number
end

function zipSub(a list number, b list number) returns list number
end

function zipMax(a list number, b list number) returns list number
end
end
```

ENGLISH

1. Overview

AFRILANG library `std/m/listzip2` (tier medium, category medium). Exports 4 function(s): zipAdd, zipMul, zipSub, zipMax.

`import "std/m/listzip2"` · `use listzip2`

- `zipAdd(a list number, b list number) ? list number`
- `zipMul(a list number, b list number) ? list number`
- `zipSub(a list number, b list number) ? list number`
- `zipMax(a list number, b list number) ? list number`

2. Installation & import

Add the module to your program:

```
import "std/m/listzip2"
use listzip2
```

Tier: medium · Category: Medium modules (m/)
Intermediate libraries ? import std/m/?

3. API reference

```
? zipAdd(a list number, b list number) ? list
? zipMul(a list number, b list number) ? list
? zipSub(a list number, b list number) ? list
? zipMax(a list number, b list number) ? list
```

4. Usage examples

```
import "std/m/listzip2"
use listzip2

create result = zipAdd(/* args */)
say result

create result = zipMul(/* args */)
say result

create result = zipSub(/* args */)
say result

create result = zipMax(/* args */)
say result
```

5. Best practices

```
? Prefer `import "std/m/listzip2"` at the top of your file.
? Run `afrilang check` before shipping.
? Combine with related stdlib modules from the same category.
? See /stdlib/ for the live source and playground demos.
? Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix ? source

```
module listzip2

function zipAdd(a list number, b list number) returns list number
end

function zipMul(a list number, b list number) returns list number
end

function zipSub(a list number, b list number) returns list number
end

function zipMax(a list number, b list number) returns list number
end
end
```
