Français

1. Vue d'ensemble

Bibliothèque AFRILANG 'std/c/netpacket' (niveau complex, catégorie complex). Elle expose 7 fonction(s) : packLen, packUpper, packLower, packTrim, packSplit, packJoin, packReplace.

'import "std/c/netpacket"' · 'use netpacket'

```
- `packLen(s text) → number`
- `packUpper(s text) → text`
- `packLower(s text) → text`
- `packTrim(s text) → text`
- `packSplit(s text, delim text) → list text`
- `packJoin(parts list text, delim text) → text`
- `packReplace(s text, from text, to text) → text`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/c/netpacket"
use netpacket
```

```
Niveau : complex · Catégorie : Modules complex (c/)
Domaines avancés — graphes, NLP, réseaux complexes.
```

3. Référence API

```
•
 packLen(s text) → number•
 packUpper(s text) → text•
 packLower(s text) → text•
 packTrim(s text) → text•
 packSplit(s text, delim text) → list•
 packJoin(parts list text, delim text) → text•
 packReplace(s text, from text, to text) → text
```

4. Exemples d'utilisation

```
import "std/c/netpacket"
use netpacket
```

```
create result = packLen(/* args */)
say result
```

```
create result = packUpper(/* args */)
say result
```

```
create result = packLower(/* args */)
say result
```

```
create result = packTrim(/* args */)
say result
```

```
create result = packSplit(/* args */)
say result
```

```
create result = packJoin(/* args */)
say result
```

5. Bonnes pratiques

```
•
 Préférez `import "std/c/netpacket"` en tête de fichier.•
 Lancez `afrilang check` avant de livrer.•
 Combinez avec les modules stdlib de la même catégorie.•
 Voir /stdlib/ pour le source live et les démos playground.•
 Signalez les problèmes sur GitHub si une export manque.
```

6. Annexe — source

module netpacket

```
function packLen(s text) returns number
end
```

```
function packUpper(s text) returns text
end
```

```
function packLower(s text) returns text
end
```

```
function packTrim(s text) returns text
end
```

```
function packSplit(s text, delim text) returns list text
end
```

```
function packJoin(parts list text, delim text) returns text
end
```

```
function packReplace(s text, from text, to text) returns text
end
end
```

English

1. Overview

AFRILANG library ‘std/c/netpacket‘ (tier complex, category complex). Exports 7 function(s): packLen, packUpper, packLower, packTrim, packSplit, packJoin, packReplace.

‘import ”std/c/netpacket”‘ · ‘use netpacket‘

```
- `packLen(s text) → number`
- `packUpper(s text) → text`
- `packLower(s text) → text`
- `packTrim(s text) → text`
- `packSplit(s text, delim text) → list text`
- `packJoin(parts list text, delim text) → text`
- `packReplace(s text, from text, to text) → text`
```

2. Installation & import

Add the module to your program:

```
import "std/c/netpacket"
use netpacket
```

```
Tier: complex · Category: Complex modules (c/)
Advanced domains — graphs, NLP, complex networks.
```

3. API reference

```
•
 packLen(s text) → number•
 packUpper(s text) → text•
 packLower(s text) → text•
 packTrim(s text) → text•
 packSplit(s text, delim text) → list•
 packJoin(parts list text, delim text) → text•
 packReplace(s text, from text, to text) → text
```

4. Usage examples

```
import "std/c/netpacket"
use netpacket
```

```
create result = packLen(/* args */)
say result
```

```
create result = packUpper(/* args */)
say result
```

```
create result = packLower(/* args */)
say result
```

```
create result = packTrim(/* args */)
say result
```

```
create result = packSplit(/* args */)
say result
```

```
create result = packJoin(/* args */)
say result
```

5. Best practices

```
•
 Prefer `import "std/c/netpacket"` at the top of your file.•
 Run `afrilang check` before shipping.•
 Combine with related stdlib modules from the same category.•
 See /stdlib/ for the live source and playground demos.•
 Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix — source

module netpacket

```
function packLen(s text) returns number
end
```

```
function packUpper(s text) returns text
end
```

```
function packLower(s text) returns text
end
```

```
function packTrim(s text) returns text
end
```

```
function packSplit(s text, delim text) returns list text
end
```

```
function packJoin(parts list text, delim text) returns text
end
```

```
function packReplace(s text, from text, to text) returns text
end
end
```

Référence rapide / Quick reference

- Import : `import "std/c/netpacket"`
- Vérification : `afrilang check`
- Documentation : `https://afrilang.dev/stdlib/std/c/netpacket/`

Source (extrait)

```
module netpacket

function packLen(s text) returns number
end

function packUpper(s text) returns text
end

function packLower(s text) returns text
end

function packTrim(s text) returns text
end

function packSplit(s text, delim text) returns list text
end

function packJoin(parts list text, delim text) returns text
end

function packReplace(s text, from text, to text) returns text
end
end
```
