AFRILANG Stdlib

std/m/listmoving

Bibliothèque AFRILANG `std/m/listmoving` (niveau medium, catégorie medium). Elle expose 4 fonction(s) : movingAvg, movin

`import "std/m/listmoving"` · `use listmoving`

- `movingAvg(v list number, window number) ? list number`
- `movingMax(v list number, window number) ? list number`
- `movingMin(v list number, window number) ? list number`
- `movingSum(v list number, window number) ? list number`

Category: medium | Tier: medium | Functions: 4

FRANCAIS

1. Vue d'ensemble

Bibliothèque AFRILANG `std/m/listmoving` (niveau medium, catégorie medium). Elle expose 4 fonction(s) : movingAvg, movin

`import "std/m/listmoving"` · `use listmoving`

- `movingAvg(v list number, window number) ? list number`
- `movingMax(v list number, window number) ? list number`
- `movingMin(v list number, window number) ? list number`
- `movingSum(v list number, window number) ? list number`

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/listmoving"
use listmoving
```

Niveau : medium · Catégorie : Modules medium (m/)
Bibliothèques intermédiaires ? import std/m/?

3. Référence API

? movingAvg(v list number, window number) ? list
? movingMax(v list number, window number) ? list
? movingMin(v list number, window number) ? list
? movingSum(v list number, window number) ? list

4. Exemples d'utilisation

```
import "std/m/listmoving"
use listmoving

create result = movingAvg(/* args */)
say result

create result = movingMax(/* args */)
say result

create result = movingMin(/* args */)
say result

create result = movingSum(/* args */)
say result
```

5. Bonnes pratiques

? Préférez `import "std/m/listmoving"` en tête de fichier.
? Lancez `afrilang check` avant de livrer.
? Combinez avec les modules stdlib de la même catégorie.
? Voir /stdlib/ pour le source live et les démos playground.
? Signalez les problèmes sur GitHub si une export manque.

6. Annexe ? source

```
module listmoving

function movingAvg(v list number, window number) returns list number
end

function movingMax(v list number, window number) returns list number
end

function movingMin(v list number, window number) returns list number
end

function movingSum(v list number, window number) returns list number
end
end
```

ENGLISH

1. Overview

AFRILANG library `std/m/listmoving` (tier medium, category medium). Exports 4 function(s): movingAvg, movingMax, movingM

`import "std/m/listmoving"` · `use listmoving`

- `movingAvg(v list number, window number) ? list number`
- `movingMax(v list number, window number) ? list number`
- `movingMin(v list number, window number) ? list number`
- `movingSum(v list number, window number) ? list number`

2. Installation & import

Add the module to your program:

```
import "std/m/listmoving"
use listmoving
```

Tier: medium · Category: Medium modules (m/)
Intermediate libraries ? import std/m/?

3. API reference

? movingAvg(v list number, window number) ? list
? movingMax(v list number, window number) ? list
? movingMin(v list number, window number) ? list
? movingSum(v list number, window number) ? list

4. Usage examples

```
import "std/m/listmoving"
use listmoving

create result = movingAvg(/* args */)
say result

create result = movingMax(/* args */)
say result

create result = movingMin(/* args */)
say result

create result = movingSum(/* args */)
say result
```

5. Best practices

? Prefer `import "std/m/listmoving"` at the top of your file.
? Run `afrilang check` before shipping.
? Combine with related stdlib modules from the same category.
? See /stdlib/ for the live source and playground demos.
? Report issues on GitHub if an export is missing or undocumented.

6. Appendix ? source

```
module listmoving

function movingAvg(v list number, window number) returns list number
end

function movingMax(v list number, window number) returns list number
end

function movingMin(v list number, window number) returns list number
end

function movingSum(v list number, window number) returns list number
end
end
```
