AFRILANG Stdlib

std/m/mattranspose

Français. Bibliothèque AFRILANG ‘std/m/mattranspose‘ (niveau medium, catégorie medium). Elle expose 4 fonction(s) : transpose2x2, transpose3x3, isSquare, identity2.
‘import ”std/m/mattranspose”‘ · ‘use mattranspose‘
- ‘transpose2x2(m list number) → list number‘ - ‘transpose3x3(m list number) → list number‘ - ‘isSquare(m list number, n number) → bool‘ - ‘identity2(ignored number) → list number‘ **English.** AFRILANG library

‘std/m/mattranspose‘ (tier medium, category medium). Exports 4 function(s): transpose2x2, transpose3x3, isSquare, identity2.
‘import ”std/m/mattranspose”‘ · ‘use mattranspose‘
- ‘transpose2x2(m list number) → list number‘ - ‘transpose3x3(m list number) → list number‘ - ‘isSquare(m list number, n number) → bool‘ - ‘identity2(ignored number) → list number‘

1. Vue d'ensemble

Bibliothèque AFRILANG 'std/m/mattranspose' (niveau medium, catégorie medium). Elle expose 4 fonction(s) : transpose2x2, transpose3x3, isSquare, identity2.

'import "std/m/mattranspose"' · 'use mattranspose'

```
- `transpose2x2(m list number) → list number`
- `transpose3x3(m list number) → list number`
- `isSquare(m list number, n number) → bool`
- `identity2(ignored number) → list number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/mattranspose"
use mattranspose
```

```
Niveau : medium · Catégorie : Modules medium (m/)
Bibliothèques intermédiaires — import std/m…/
```

3. Référence API

```
•
 transpose2x2(m list number) → list•
 transpose3x3(m list number) → list•
 isSquare(m list number, n number) → bool•
 identity2(ignored number) → list
```

4. Exemples d'utilisation

```
import "std/m/mattranspose"
use mattranspose
```

```
create result = transpose2x2(/* args */)
say result
```

```
create result = transpose3x3(/* args */)
say result
```

```
create result = isSquare(/* args */)
say result
```

```
create result = identity2(/* args */)
say result
```

5. Bonnes pratiques

```
•
 Préférez `import "std/m/mattranspose"` en tête de fichier.•
 Lancez `afrilang check` avant de livrer.•
 Combinez avec les modules stdlib de la même catégorie.•
 Voir /stdlib/ pour le source live et les démos playground.•
 Signalez les problèmes sur GitHub si une export manque.
```

6. Annexe — source

module mattranspose

```
function transpose2x2(m list number) returns list number
end
```

```
function transpose3x3(m list number) returns list number
end
```

```
function isSquare(m list number, n number) returns bool
end
```

```
function identity2(ignored number) returns list number
end
end
```

English

1. Overview

AFRILANG library 'std/m/mattranspose' (tier medium, category medium). Exports 4 function(s): transpose2x2, transpose3x3, isSquare, identity2.
'import "std/m/mattranspose"' · 'use mattranspose'

```
- `transpose2x2(m list number) → list number`
- `transpose3x3(m list number) → list number`
- `isSquare(m list number, n number) → bool`
- `identity2(ignored number) → list number`
```

2. Installation & import

Add the module to your program:

```
import "std/m/mattranspose"
use mattranspose
```

```
Tier: medium · Category: Medium modules (m/)
Intermediate libraries — import std/m…/
```

3. API reference

```
•
 transpose2x2(m list number) → list•
 transpose3x3(m list number) → list•
 isSquare(m list number, n number) → bool•
 identity2(ignored number) → list
```

4. Usage examples

```
import "std/m/mattranspose"
use mattranspose
```

```
create result = transpose2x2(/* args */)
say result
```

```
create result = transpose3x3(/* args */)
say result
```

```
create result = isSquare(/* args */)
say result
```

```
create result = identity2(/* args */)
say result
```

5. Best practices

```
•
 Prefer `import "std/m/mattranspose"` at the top of your file.•
 Run `afrilang check` before shipping.•
 Combine with related stdlib modules from the same category.•
 See /stdlib/ for the live source and playground demos.•
 Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix — source

module mattranspose

```
function transpose2x2(m list number) returns list number
end
```

```
function transpose3x3(m list number) returns list number
end
```

```
function isSquare(m list number, n number) returns bool
end
```

```
function identity2(ignored number) returns list number
end
end
```

Référence rapide / Quick reference

- Import : `import "std/m/mattranspose"`
- Vérification : `afrilang check`
- Documentation : https://afrilang.dev/stdlib/std/m/mattranspose/

Source (extrait)

```
module mattranspose

function transpose2x2(m list number) returns list number
end

function transpose3x3(m list number) returns list number
end

function isSquare(m list number, n number) returns bool
end

function identity2(ignored number) returns list number
end
end
```
