1. Vue d’ensemble

Bibliothèque AFRILANG ‘std/c/sigmatrix‘ (niveau complex, catégorie complex). Elle expose 7 fonction(s) : matrSum, matrMean, matrMin, matrMax, matrVar, matrStd, matrNorm.

‘import ”std/c/sigmatrix”‘ · ‘use sigmatrix‘

```
- `matrSum(v list number) → number`
- `matrMean(v list number) → number`
- `matrMin(v list number) → number`
- `matrMax(v list number) → number`
- `matrVar(v list number) → number`
- `matrStd(v list number) → number`
- `matrNorm(v list number) → list number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/c/sigmatrix"
use sigmatrix
```

```
Niveau : complex · Catégorie : Modules complex (c/)
Domaines avancés — graphes, NLP, réseaux complexes.
```

3. Référence API

```
•
 matrSum(v list number) → number•
 matrMean(v list number) → number•
 matrMin(v list number) → number•
 matrMax(v list number) → number•
 matrVar(v list number) → number•
 matrStd(v list number) → number•
 matrNorm(v list number) → list
```

4. Exemples d’utilisation

```
import "std/c/sigmatrix"
use sigmatrix
```

```
create result = matrSum(/* args */)
say result
```

```
create result = matrMean(/* args */)
say result
```

```
create result = matrMin(/* args */)
say result
```

```
create result = matrMax(/* args */)
say result
```

```
create result = matrVar(/* args */)
say result
```

```
create result = matrStd(/* args */)
say result
```

5. Bonnes pratiques

```
•
 Préférez `import "std/c/sigmatrix"` en tête de fichier.•
 Lancez `afrilang check` avant de livrer.•
 Combinez avec les modules stdlib de la même catégorie.•
 Voir /stdlib/ pour le source live et les démos playground.•
 Signalez les problèmes sur GitHub si une export manque.
```

6. Annexe — source

module sigmatrix

```
function matrSum(v list number) returns number
end
```

```
function matrMean(v list number) returns number
end
```

```
function matrMin(v list number) returns number
end
```

```
function matrMax(v list number) returns number
end
```

```
function matrVar(v list number) returns number
end
```

```
function matrStd(v list number) returns number
end
```

```
function matrNorm(v list number) returns list number
end
end
```

English

1. Overview

AFRILANG library ‘std/c/sigmatrix‘ (tier complex, category complex). Exports 7 function(s): matrSum, matrMean, matrMin, matrMax, matrVar, matrStd, matrNorm.
‘import ”std/c/sigmatrix”‘ · ‘use sigmatrix‘

```
- `matrSum(v list number) → number`
- `matrMean(v list number) → number`
- `matrMin(v list number) → number`
- `matrMax(v list number) → number`
- `matrVar(v list number) → number`
- `matrStd(v list number) → number`
- `matrNorm(v list number) → list number`
```

2. Installation & import

Add the module to your program:

```
import "std/c/sigmatrix"
use sigmatrix
```

```
Tier: complex · Category: Complex modules (c/)
Advanced domains — graphs, NLP, complex networks.
```

3. API reference

```
•
 matrSum(v list number) → number•
 matrMean(v list number) → number•
 matrMin(v list number) → number•
 matrMax(v list number) → number•
 matrVar(v list number) → number•
 matrStd(v list number) → number•
 matrNorm(v list number) → list
```

4. Usage examples

```
import "std/c/sigmatrix"
use sigmatrix
```

```
create result = matrSum(/* args */)
say result
```

```
create result = matrMean(/* args */)
say result
```

```
create result = matrMin(/* args */)
say result
```

```
create result = matrMax(/* args */)
say result
```

```
create result = matrVar(/* args */)
say result
```

```
create result = matrStd(/* args */)
say result
```

5. Best practices

```
•
 Prefer `import "std/c/sigmatrix"` at the top of your file.•
 Run `afrilang check` before shipping.•
 Combine with related stdlib modules from the same category.•
 See /stdlib/ for the live source and playground demos.•
 Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix — source

module sigmatrix

```
function matrSum(v list number) returns number
end
```

```
function matrMean(v list number) returns number
end
```

```
function matrMin(v list number) returns number
end
```

```
function matrMax(v list number) returns number
end
```

```
function matrVar(v list number) returns number
end
```

```
function matrStd(v list number) returns number
end
```

```
function matrNorm(v list number) returns list number
end
end
```

Référence rapide / Quick reference

- Import : `import "std/c/sigmatrix"`
- Vérification : `afrilang check`
- Documentation : `https://afrilang.dev/stdlib/std/c/sigmatrix/`

Source (extrait)

```
module sigmatrix

function matrSum(v list number) returns number
end

function matrMean(v list number) returns number
```

```
end

function matrMin(v list number) returns number
end

function matrMax(v list number) returns number
end

function matrVar(v list number) returns number
end

function matrStd(v list number) returns number
end

function matrNorm(v list number) returns list number
end
end
```
