

AFRILANG Stdlib

std/c/tscumulative

Bibliothèque AFRILANG `std/c/tscumulative` (niveau complex, catégorie complex). Elle expose 7 fonction(s) :
cumuSum, cum

```
`import "std/c/tscumulative" . `use tscumulative`
```

- `cumuSum(v list number) ? number`
- `cumuMean(v list number) ? number`
- `cumuMin(v list number) ? number`
- `cumuMax(v list number) ? number`
- `cumuVar(v list number) ? number`
- `cumuStd(v list number) ? number`
- `cumuNorm(v list number) ? list number`

Category: complex | Tier: complex | Functions: 7

FRANCAIS

1. Vue d'ensemble

Bibliothèque AFRILANG `std/c/tscumulative` (niveau complex, catégorie complex). Elle expose 7 fonction(s) : cumuSum, cum

```
`import "std/c/tscumulative" . `use tscumulative`  
- `cumuSum(v list number) ? number`  
- `cumuMean(v list number) ? number`  
- `cumuMin(v list number) ? number`  
- `cumuMax(v list number) ? number`  
- `cumuVar(v list number) ? number`  
- `cumuStd(v list number) ? number`  
- `cumuNorm(v list number) ? list number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/c/tscumulative"  
use tscumulative
```

Niveau : complex · Catégorie : Modules complex (c/)
Domaines avancés ? graphes, NLP, réseaux complexes.

3. Référence API

```
? cumuSum(v list number) ? number  
? cumuMean(v list number) ? number  
? cumuMin(v list number) ? number  
? cumuMax(v list number) ? number  
? cumuVar(v list number) ? number  
? cumuStd(v list number) ? number  
? cumuNorm(v list number) ? list
```

4. Exemples d'utilisation

```
import "std/c/tscumulative"  
use tscumulative  
  
create result = cumuSum(/* args */)   
say result  
  
create result = cumuMean(/* args */)   
say result  
  
create result = cumuMin(/* args */)   
say result  
  
create result = cumuMax(/* args */)   
say result  
  
create result = cumuVar(/* args */)   
say result  
  
create result = cumuStd(/* args */)   
say result
```

5. Bonnes pratiques

? Préférez `import "std/c/tscumulative"` en tête de fichier.
? Lancez `afirilang check` avant de livrer.
? Combinez avec les modules stdlib de la même catégorie.
? Voir /stdlib/ pour le source live et les démos playground.
? Signalez les problèmes sur GitHub si une export manque.

6. Annexe ? source

```
module tscumulative
```

```
function cumuSum(v list number) returns number
end

function cumuMean(v list number) returns number
end

function cumuMin(v list number) returns number
end

function cumuMax(v list number) returns number
end

function cumuVar(v list number) returns number
end

function cumuStd(v list number) returns number
end

function cumuNorm(v list number) returns list number
end
end
```

ENGLISH

1. Overview

AFRILANG library `std/c/tscumulative` (tier complex, category complex). Exports 7 function(s):
cumuSum, cumuMean, cumuMi

```
`import "std/c/tscumulative"` . `use tscumulative`  
- `cumuSum(v list number) ? number`  
- `cumuMean(v list number) ? number`  
- `cumuMin(v list number) ? number`  
- `cumuMax(v list number) ? number`  
- `cumuVar(v list number) ? number`  
- `cumuStd(v list number) ? number`  
- `cumuNorm(v list number) ? list number`
```

2. Installation & import

Add the module to your program:

```
import "std/c/tscumulative"  
use tscumulative
```

Tier: complex · Category: Complex modules (c/)
Advanced domains ? graphs, NLP, complex networks.

3. API reference

```
? cumuSum(v list number) ? number  
? cumuMean(v list number) ? number  
? cumuMin(v list number) ? number  
? cumuMax(v list number) ? number  
? cumuVar(v list number) ? number  
? cumuStd(v list number) ? number  
? cumuNorm(v list number) ? list
```

4. Usage examples

```
import "std/c/tscumulative"  
use tscumulative  
  
create result = cumuSum(/* args */)   
say result  
  
create result = cumuMean(/* args */)   
say result  
  
create result = cumuMin(/* args */)   
say result  
  
create result = cumuMax(/* args */)   
say result  
  
create result = cumuVar(/* args */)   
say result  
  
create result = cumuStd(/* args */)   
say result
```

5. Best practices

```
? Prefer `import "std/c/tscumulative"` at the top of your file.  
? Run `afirang check` before shipping.  
? Combine with related stdlib modules from the same category.  
? See /stdlib/ for the live source and playground demos.  
? Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix ? source

```
module tscumulative
```

```
function cumuSum(v list number) returns number
end

function cumuMean(v list number) returns number
end

function cumuMin(v list number) returns number
end

function cumuMax(v list number) returns number
end

function cumuVar(v list number) returns number
end

function cumuStd(v list number) returns number
end

function cumuNorm(v list number) returns list number
end
end
```
