

AFRILANG Stdlib

std/m/listquantile

Bibliothèque AFRILANG `std/m/listquantile` (niveau medium, catégorie medium). Elle expose 4 fonction(s) : quantile, perc

```
`import "std/m/listquantile" . `use listquantile`  
  
- `quantile(v list number, q number) ? number`  
- `percentile(v list number, p number) ? number`  
- `decile(v list number, d number) ? number`  
- `rankOf(v list number) ? list number`
```

Category: medium | Tier: medium | Functions: 4

FRANCAIS

1. Vue d'ensemble

Bibliothèque AFRILANG `std/m/listquantile` (niveau medium, catégorie medium). Elle expose 4 fonction(s) : quantile, perc

```
`import "std/m/listquantile"` . `use listquantile`  
- `quantile(v list number, q number) ? number`  
- `percentile(v list number, p number) ? number`  
- `decile(v list number, d number) ? number`  
- `rankOf(v list number) ? list number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/listquantile"  
use listquantile
```

Niveau : medium · Catégorie : Modules medium (m/)

Bibliothèques intermédiaires ? import std/m/?

3. Référence API

```
? quantile(v list number, q number) ? number  
? percentile(v list number, p number) ? number  
? decile(v list number, d number) ? number  
? rankOf(v list number) ? list
```

4. Exemples d'utilisation

```
import "std/m/listquantile"  
use listquantile  
  
create result = quantile(/* args */)   
say result  
  
create result = percentile(/* args */)   
say result  
  
create result = decile(/* args */)   
say result  
  
create result = rankOf(/* args */)   
say result
```

5. Bonnes pratiques

- ? Préférez `import "std/m/listquantile"` en tête de fichier.
- ? Lancez `afirilang check` avant de livrer.
- ? Combinez avec les modules stdlib de la même catégorie.
- ? Voir /stdlib/ pour le source live et les démos playground.
- ? Signalez les problèmes sur GitHub si une export manque.

6. Annexe ? source

```
module listquantile  
  
function quantile(v list number, q number) returns number  
end  
  
function percentile(v list number, p number) returns number  
end  
  
function decile(v list number, d number) returns number  
end  
  
function rankOf(v list number) returns list number  
end  
end
```

ENGLISH

1. Overview

AFRILANG library `std/m/listquantile` (tier medium, category medium). Exports 4 function(s): quantile, percentile, decil

```
`import "std/m/listquantile"` . `use listquantile`  
- `quantile(v list number, q number) ? number`  
- `percentile(v list number, p number) ? number`  
- `decile(v list number, d number) ? number`  
- `rankOf(v list number) ? list number`
```

2. Installation & import

Add the module to your program:

```
import "std/m/listquantile"  
use listquantile
```

Tier: medium · Category: Medium modules (m/)
Intermediate libraries ? import std/m/?

3. API reference

```
? quantile(v list number, q number) ? number  
? percentile(v list number, p number) ? number  
? decile(v list number, d number) ? number  
? rankOf(v list number) ? list
```

4. Usage examples

```
import "std/m/listquantile"  
use listquantile  
  
create result = quantile(/* args */)   
say result  
  
create result = percentile(/* args */)   
say result  
  
create result = decile(/* args */)   
say result  
  
create result = rankOf(/* args */)   
say result
```

5. Best practices

```
? Prefer `import "std/m/listquantile"` at the top of your file.  
? Run `afirang check` before shipping.  
? Combine with related stdlib modules from the same category.  
? See /stdlib/ for the live source and playground demos.  
? Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix ? source

```
module listquantile  
  
function quantile(v list number, q number) returns number  
end  
  
function percentile(v list number, p number) returns number  
end  
  
function decile(v list number, d number) returns number  
end  
  
function rankOf(v list number) returns list number  
end  
end
```
