

AFRILANG Stdlib

std/m/listvar

Bibliothèque AFRILANG `std/m/listvar` (niveau medium, catégorie medium). Elle expose 4 fonction(s) :
variance, stddev, p

```
`import "std/m/listvar" . `use listvar`
```

- `variance(v list number) ? number`
- `stddev(v list number) ? number`
- `popVariance(v list number) ? number`
- `popStddev(v list number) ? number`

Category: medium | Tier: medium | Functions: 4

FRANCAIS

1. Vue d'ensemble

Bibliothèque AFRILANG `std/m/listvar` (niveau medium, catégorie medium). Elle expose 4 fonction(s) : variance, stddev, p

```
`import "std/m/listvar"` . `use listvar`  
- `variance(v list number) ? number`  
- `stddev(v list number) ? number`  
- `popVariance(v list number) ? number`  
- `popStddev(v list number) ? number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/listvar"  
use listvar
```

Niveau : medium · Catégorie : Modules medium (m/)

Bibliothèques intermédiaires ? import std/m/?

3. Référence API

```
? variance(v list number) ? number  
? stddev(v list number) ? number  
? popVariance(v list number) ? number  
? popStddev(v list number) ? number
```

4. Exemples d'utilisation

```
import "std/m/listvar"  
use listvar  
  
create result = variance(/* args */)   
say result  
  
create result = stddev(/* args */)   
say result  
  
create result = popVariance(/* args */)   
say result  
  
create result = popStddev(/* args */)   
say result
```

5. Bonnes pratiques

```
? Préférez `import "std/m/listvar"` en tête de fichier.  
? Lancez `afrilang check` avant de livrer.  
? Combinez avec les modules stdlib de la même catégorie.  
? Voir /stdlib/ pour le source live et les démos playground.  
? Signalez les problèmes sur GitHub si une export manque.
```

6. Annexe ? source

```
module listvar  
  
function variance(v list number) returns number  
end  
  
function stddev(v list number) returns number  
end  
  
function popVariance(v list number) returns number  
end  
  
function popStddev(v list number) returns number  
end  
end
```

ENGLISH

1. Overview

AFRILANG library `std/m/listvar` (tier medium, category medium). Exports 4 function(s): variance, stddev, popVariance, p

```
`import "std/m/listvar"` · `use listvar`  
- `variance(v list number) ? number`  
- `stddev(v list number) ? number`  
- `popVariance(v list number) ? number`  
- `popStddev(v list number) ? number`
```

2. Installation & import

Add the module to your program:

```
import "std/m/listvar"  
use listvar
```

Tier: medium · Category: Medium modules (m/)
Intermediate libraries ? import std/m/?

3. API reference

```
? variance(v list number) ? number  
? stddev(v list number) ? number  
? popVariance(v list number) ? number  
? popStddev(v list number) ? number
```

4. Usage examples

```
import "std/m/listvar"  
use listvar  
  
create result = variance(/* args */)   
say result  
  
create result = stddev(/* args */)   
say result  
  
create result = popVariance(/* args */)   
say result  
  
create result = popStddev(/* args */)   
say result
```

5. Best practices

```
? Prefer `import "std/m/listvar"` at the top of your file.  
? Run `afrilang check` before shipping.  
? Combine with related stdlib modules from the same category.  
? See /stdlib/ for the live source and playground demos.  
? Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix ? source

```
module listvar  
  
function variance(v list number) returns number  
end  
  
function stddev(v list number) returns number  
end  
  
function popVariance(v list number) returns number  
end  
  
function popStddev(v list number) returns number  
end  
end
```
