

AFRILANG Stdlib

std/m/matadd

Bibliothèque AFRILANG `std/m/matadd` (niveau medium, catégorie medium). Elle expose 4 fonction(s) : add, sub, neg, addSc

```
`import "std/m/matadd" · `use matadd`
```

- `add(a list number, b list number) ? list number`
- `sub(a list number, b list number) ? list number`
- `neg(m list number) ? list number`
- `addScalar(m list number, s number) ? list number`

Category: medium | Tier: medium | Functions: 4

FRANCAIS

1. Vue d'ensemble

Bibliothèque AFRILANG `std/m/matadd` (niveau medium, catégorie medium). Elle expose 4 fonction(s) : add, sub, neg, addSc

```
`import "std/m/matadd"` · `use matadd`  
- `add(a list number, b list number) ? list number`  
- `sub(a list number, b list number) ? list number`  
- `neg(m list number) ? list number`  
- `addScalar(m list number, s number) ? list number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/matadd"  
use matadd
```

Niveau : medium · Catégorie : Modules medium (m/)

Bibliothèques intermédiaires ? import std/m/?

3. Référence API

```
? add(a list number, b list number) ? list  
? sub(a list number, b list number) ? list  
? neg(m list number) ? list  
? addScalar(m list number, s number) ? list
```

4. Exemples d'utilisation

```
import "std/m/matadd"  
use matadd  
  
create result = add(/* args */)   
say result  
  
create result = sub(/* args */)   
say result  
  
create result = neg(/* args */)   
say result  
  
create result = addScalar(/* args */)   
say result
```

5. Bonnes pratiques

```
? Préférez `import "std/m/matadd"` en tête de fichier.  
? Lancez `afrilang check` avant de livrer.  
? Combinez avec les modules stdlib de la même catégorie.  
? Voir /stdlib/ pour le source live et les démos playground.  
? Signalez les problèmes sur GitHub si une export manque.
```

6. Annexe ? source

```
module matadd  
  
function add(a list number, b list number) returns list number  
end  
  
function sub(a list number, b list number) returns list number  
end  
  
function neg(m list number) returns list number  
end  
  
function addScalar(m list number, s number) returns list number  
end  
end
```

ENGLISH

1. Overview

AFRILANG library `std/m/matadd` (tier medium, category medium). Exports 4 function(s): add, sub, neg, addScalar.

```
`import "std/m/matadd"` . `use matadd`  
- `add(a list number, b list number) ? list number`  
- `sub(a list number, b list number) ? list number`  
- `neg(m list number) ? list number`  
- `addScalar(m list number, s number) ? list number`
```

2. Installation & import

Add the module to your program:

```
import "std/m/matadd"  
use matadd
```

Tier: medium · Category: Medium modules (m/)
Intermediate libraries ? import std/m/?

3. API reference

```
? add(a list number, b list number) ? list  
? sub(a list number, b list number) ? list  
? neg(m list number) ? list  
? addScalar(m list number, s number) ? list
```

4. Usage examples

```
import "std/m/matadd"  
use matadd  
  
create result = add(/* args */)   
say result  
  
create result = sub(/* args */)   
say result  
  
create result = neg(/* args */)   
say result  
  
create result = addScalar(/* args */)   
say result
```

5. Best practices

```
? Prefer `import "std/m/matadd"` at the top of your file.  
? Run `afrilang check` before shipping.  
? Combine with related stdlib modules from the same category.  
? See /stdlib/ for the live source and playground demos.  
? Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix ? source

```
module matadd  
  
function add(a list number, b list number) returns list number  
end  
  
function sub(a list number, b list number) returns list number  
end  
  
function neg(m list number) returns list number  
end  
  
function addScalar(m list number, s number) returns list number  
end  
end
```
