

AFRILANG Stdlib

std/m/numstats

Bibliothèque AFRILANG `std/m/numstats` (niveau medium, catégorie medium). Elle expose 5 fonction(s) :
sum, mean, minVal,

```
`import "std/m/numstats" . `use numstats`
```

- `sum(v list number) ? number`
- `mean(v list number) ? number`
- `minVal(v list number) ? number`
- `maxVal(v list number) ? number`
- `range(v list number) ? number`

Category: medium | Tier: medium | Functions: 5

FRANCAIS

1. Vue d'ensemble

Bibliothèque AFRILANG `std/m/numstats` (niveau medium, catégorie medium). Elle expose 5 fonction(s) : sum, mean, minVal,

```
`import "std/m/numstats"` · `use numstats`  
- `sum(v list number) ? number`  
- `mean(v list number) ? number`  
- `minVal(v list number) ? number`  
- `maxVal(v list number) ? number`  
- `range(v list number) ? number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/numstats"  
use numstats
```

Niveau : medium · Catégorie : Modules medium (m/)
Bibliothèques intermédiaires ? import std/m/?

3. Référence API

```
? sum(v list number) ? number  
? mean(v list number) ? number  
? minVal(v list number) ? number  
? maxVal(v list number) ? number  
? range(v list number) ? number
```

4. Exemples d'utilisation

```
import "std/m/numstats"  
use numstats  
  
create result = sum(/* args */)   
say result  
  
create result = mean(/* args */)   
say result  
  
create result = minVal(/* args */)   
say result  
  
create result = maxVal(/* args */)   
say result  
  
create result = range(/* args */)   
say result
```

5. Bonnes pratiques

- ? Préférez `import "std/m/numstats"` en tête de fichier.
- ? Lancez `afrilang check` avant de livrer.
- ? Combinez avec les modules stdlib de la même catégorie.
- ? Voir /stdlib/ pour le source live et les démos playground.
- ? Signalez les problèmes sur GitHub si une export manque.

6. Annexe ? source

```
module numstats  
  
function sum(v list number) returns number  
end  
  
function mean(v list number) returns number  
end  
  
function minVal(v list number) returns number
```

end

function maxVal(v list number) returns number

end

function range(v list number) returns number

end

end

ENGLISH

1. Overview

AFRILANG library `std/m/numstats` (tier medium, category medium). Exports 5 function(s): sum, mean, minVal, maxVal, rang

```
`import "std/m/numstats"` · `use numstats`  
- `sum(v list number) ? number`  
- `mean(v list number) ? number`  
- `minVal(v list number) ? number`  
- `maxVal(v list number) ? number`  
- `range(v list number) ? number`
```

2. Installation & import

Add the module to your program:

```
import "std/m/numstats"  
use numstats
```

Tier: medium · Category: Medium modules (m/)
Intermediate libraries ? import std/m/?

3. API reference

```
? sum(v list number) ? number  
? mean(v list number) ? number  
? minVal(v list number) ? number  
? maxVal(v list number) ? number  
? range(v list number) ? number
```

4. Usage examples

```
import "std/m/numstats"  
use numstats  
  
create result = sum(/* args */)   
say result  
  
create result = mean(/* args */)   
say result  
  
create result = minVal(/* args */)   
say result  
  
create result = maxVal(/* args */)   
say result  
  
create result = range(/* args */)   
say result
```

5. Best practices

```
? Prefer `import "std/m/numstats"` at the top of your file.  
? Run `afrilang check` before shipping.  
? Combine with related stdlib modules from the same category.  
? See /stdlib/ for the live source and playground demos.  
? Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix ? source

```
module numstats  
  
function sum(v list number) returns number  
end  
  
function mean(v list number) returns number  
end  
  
function minVal(v list number) returns number
```

end

function maxVal(v list number) returns number

end

function range(v list number) returns number

end

end
