

AFRILANG Stdlib

std/m/textstats

Bibliothèque AFRILANG `std/m/textstats` (niveau medium, catégorie medium). Elle expose 5 fonction(s) : wordCount, charCo

```
`import "std/m/textstats" . `use textstats`
```

- `wordCount(s text) ? number`
- `charCount(s text) ? number`
- `lineCount(s text) ? number`
- `avgWordLen(s text) ? number`
- `digitCount(s text) ? number`

Category: medium | Tier: medium | Functions: 5

FRANCAIS

1. Vue d'ensemble

Bibliothèque AFRILANG `std/m/textstats` (niveau medium, catégorie medium). Elle expose 5 fonction(s) : wordCount, charCo

```
`import "std/m/textstats"` · `use textstats`  
- `wordCount(s text) ? number`  
- `charCount(s text) ? number`  
- `lineCount(s text) ? number`  
- `avgWordLen(s text) ? number`  
- `digitCount(s text) ? number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/textstats"  
use textstats
```

Niveau : medium · Catégorie : Modules medium (m/)
Bibliothèques intermédiaires ? import std/m/?

3. Référence API

```
? wordCount(s text) ? number  
? charCount(s text) ? number  
? lineCount(s text) ? number  
? avgWordLen(s text) ? number  
? digitCount(s text) ? number
```

4. Exemples d'utilisation

```
import "std/m/textstats"  
use textstats  
  
create result = wordCount(/* args */)   
say result  
  
create result = charCount(/* args */)   
say result  
  
create result = lineCount(/* args */)   
say result  
  
create result = avgWordLen(/* args */)   
say result  
  
create result = digitCount(/* args */)   
say result
```

5. Bonnes pratiques

```
? Préférez `import "std/m/textstats"` en tête de fichier.  
? Lancez `afrilang check` avant de livrer.  
? Combinez avec les modules stdlib de la même catégorie.  
? Voir /stdlib/ pour le source live et les démos playground.  
? Signalez les problèmes sur GitHub si une export manque.
```

6. Annexe ? source

```
module textstats  
  
function wordCount(s text) returns number  
end  
  
function charCount(s text) returns number  
end  
  
function lineCount(s text) returns number
```

end

function avgWordLen(s text) returns number

end

function digitCount(s text) returns number

end

end

ENGLISH

1. Overview

AFRILANG library `std/m/textstats` (tier medium, category medium). Exports 5 function(s): wordCount, charCount, lineCount

```
`import "std/m/textstats"` · `use textstats`  
- `wordCount(s text) ? number`  
- `charCount(s text) ? number`  
- `lineCount(s text) ? number`  
- `avgWordLen(s text) ? number`  
- `digitCount(s text) ? number`
```

2. Installation & import

Add the module to your program:

```
import "std/m/textstats"  
use textstats
```

Tier: medium · Category: Medium modules (m/)
Intermediate libraries ? import std/m/?

3. API reference

```
? wordCount(s text) ? number  
? charCount(s text) ? number  
? lineCount(s text) ? number  
? avgWordLen(s text) ? number  
? digitCount(s text) ? number
```

4. Usage examples

```
import "std/m/textstats"  
use textstats  
  
create result = wordCount(/* args */)   
say result  
  
create result = charCount(/* args */)   
say result  
  
create result = lineCount(/* args */)   
say result  
  
create result = avgWordLen(/* args */)   
say result  
  
create result = digitCount(/* args */)   
say result
```

5. Best practices

```
? Prefer `import "std/m/textstats"` at the top of your file.  
? Run `afrilang check` before shipping.  
? Combine with related stdlib modules from the same category.  
? See /stdlib/ for the live source and playground demos.  
? Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix ? source

```
module textstats  
  
function wordCount(s text) returns number  
end  
  
function charCount(s text) returns number  
end  
  
function lineCount(s text) returns number
```

end

function avgWordLen(s text) returns number

end

function digitCount(s text) returns number

end

end
