

AFRILANG Stdlib

std/c/nlpjaccard

Bibliothèque AFRILANG `std/c/nlpjaccard` (niveau complex, catégorie complex). Elle expose 6 fonction(s) : similarity, to

```
`import "std/c/nlpjaccard" . `use nlpjaccard`
```

- `similarity(a text, b text) ? number`
- `tokenJaccard(a text, b text) ? number`
- `distance(a text, b text) ? number`
- `ngramJaccard(a text, b text, n number) ? number`
- `overlap(a text, b text) ? number`
- `dice(a text, b text) ? number`

Category: complex | Tier: complex | Functions: 6

FRANCAIS

1. Vue d'ensemble

Bibliothèque AFRILANG `std/c/nlpjaccard` (niveau complex, catégorie complex). Elle expose 6 fonction(s) : similarity, to

```
`import "std/c/nlpjaccard"` . `use nlpjaccard`  
- `similarity(a text, b text) ? number`  
- `tokenJaccard(a text, b text) ? number`  
- `distance(a text, b text) ? number`  
- `ngramJaccard(a text, b text, n number) ? number`  
- `overlap(a text, b text) ? number`  
- `dice(a text, b text) ? number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/c/nlpjaccard"  
use nlpjaccard
```

Niveau : complex · Catégorie : Modules complex (c/)
Domaines avancés ? graphes, NLP, réseaux complexes.

3. Référence API

```
? similarity(a text, b text) ? number  
? tokenJaccard(a text, b text) ? number  
? distance(a text, b text) ? number  
? ngramJaccard(a text, b text, n number) ? number  
? overlap(a text, b text) ? number  
? dice(a text, b text) ? number
```

4. Exemples d'utilisation

```
import "std/c/nlpjaccard"  
use nlpjaccard  
  
create result = similarity(/* args */)   
say result  
  
create result = tokenJaccard(/* args */)   
say result  
  
create result = distance(/* args */)   
say result  
  
create result = ngramJaccard(/* args */)   
say result  
  
create result = overlap(/* args */)   
say result  
  
create result = dice(/* args */)   
say result
```

5. Bonnes pratiques

```
? Préférez `import "std/c/nlpjaccard"` en tête de fichier.  
? Lancez `afrilang check` avant de livrer.  
? Combinez avec les modules stdlib de la même catégorie.  
? Voir /stdlib/ pour le source live et les démos playground.  
? Signalez les problèmes sur GitHub si une export manque.
```

6. Annexe ? source

```
module nlpjaccard  
  
function similarity(a text, b text) returns number  
end
```

```
function tokenJaccard(a text, b text) returns number
end

function distance(a text, b text) returns number
end

function ngramJaccard(a text, b text, n number) returns number
end

function overlap(a text, b text) returns number
end

function dice(a text, b text) returns number
end
end
```

ENGLISH

1. Overview

AFRILANG library `std/c/nlpjaccard` (tier complex, category complex). Exports 6 function(s): similarity, tokenJaccard, d

```
`import "std/c/nlpjaccard"` . `use nlpjaccard`  
- `similarity(a text, b text) ? number`  
- `tokenJaccard(a text, b text) ? number`  
- `distance(a text, b text) ? number`  
- `ngramJaccard(a text, b text, n number) ? number`  
- `overlap(a text, b text) ? number`  
- `dice(a text, b text) ? number`
```

2. Installation & import

Add the module to your program:

```
import "std/c/nlpjaccard"  
use nlpjaccard
```

Tier: complex · Category: Complex modules (c/)
Advanced domains ? graphs, NLP, complex networks.

3. API reference

```
? similarity(a text, b text) ? number  
? tokenJaccard(a text, b text) ? number  
? distance(a text, b text) ? number  
? ngramJaccard(a text, b text, n number) ? number  
? overlap(a text, b text) ? number  
? dice(a text, b text) ? number
```

4. Usage examples

```
import "std/c/nlpjaccard"  
use nlpjaccard  
  
create result = similarity(/* args */)   
say result  
  
create result = tokenJaccard(/* args */)   
say result  
  
create result = distance(/* args */)   
say result  
  
create result = ngramJaccard(/* args */)   
say result  
  
create result = overlap(/* args */)   
say result  
  
create result = dice(/* args */)   
say result
```

5. Best practices

```
? Prefer `import "std/c/nlpjaccard"` at the top of your file.  
? Run `afrilang check` before shipping.  
? Combine with related stdlib modules from the same category.  
? See /stdlib/ for the live source and playground demos.  
? Report issues on GitHub if an export is missing or undocumented.
```

6. Appendix ? source

```
module nlpjaccard  
  
function similarity(a text, b text) returns number  
end
```

```
function tokenJaccard(a text, b text) returns number
end

function distance(a text, b text) returns number
end

function ngramJaccard(a text, b text, n number) returns number
end

function overlap(a text, b text) returns number
end

function dice(a text, b text) returns number
end
end
```
