

AFRILANG Stdlib

std/c/csvhaving

Français. Bibliothèque AFRILANG 'std/c/csvhaving' (niveau complex, catégorie complex). Elle expose 8 fonction(s) : haviSum, haviMean, haviMin, haviMax, haviVar, haviStd, haviNorm, filterGt.

```
'import "std/c/csvhaving"' · 'use csvhaving'  
- 'haviSum(v list number) → number' - 'haviMean(v list number) → num-  
ber' - 'haviMin(v list number) → number' - 'haviMax(v list number)  
→ number' - 'haviVar(v list number) → number' - 'haviStd(v list num-  
ber) → number' - 'haviNorm(v list number) → list number' - 'filterGt(col  
list number, threshold number) → list number'
```

English. AFRILANG library 'std/c/csvhaving' (tier complex, category complex). Exports 8 function(s): haviSum, haviMean, haviMin, haviMax, haviVar, haviStd, haviNorm, filterGt.

```
'import "std/c/csvhaving"' · 'use csvhaving'  
- 'haviSum(v list number) → number' - 'haviMean(v list number) → num-  
ber' - 'haviMin(v list number) → number' - 'haviMax(v list number) →  
number' - 'haviVar(v list number) → number' - 'haviStd(v list number)  
→ number' - 'haviNorm(v list number) → list number' - 'filterGt(col list  
number, threshold number) → list number'
```

1. Vue d'ensemble

Bibliothèque AFRILANG 'std/c/csvhaving' (niveau complex, catégorie complex). Elle expose 8 fonction(s) : haviSum, haviMean, haviMin, haviMax, haviVar, haviStd, haviNorm, filterGt.

```
'import "std/c/csvhaving"' · 'use csvhaving'
```

```
- `haviSum(v list number) → number`
- `haviMean(v list number) → number`
- `haviMin(v list number) → number`
- `haviMax(v list number) → number`
- `haviVar(v list number) → number`
- `haviStd(v list number) → number`
- `haviNorm(v list number) → list number`
- `filterGt(col list number, threshold number) → list number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/c/csvhaving"
use csvhaving
```

Niveau : complex · Catégorie : Modules complex (c/)
Domaines avancés – graphes, NLP, réseaux complexes.

3. Référence API

- haviSum(v list number) → number•
haviMean(v list number) → number•
haviMin(v list number) → number•
haviMax(v list number) → number•
haviVar(v list number) → number•
haviStd(v list number) → number•
haviNorm(v list number) → list•
filterGt(col list number, threshold number) → list

4. Exemples d'utilisation

```
import "std/c/csvhaving"
use csvhaving
```

```
create result = haviSum(/* args */)
say result
```

```
create result = haviMean(/* args */)
say result
```

```
create result = haviMin(/* args */)
say result
```

```
create result = haviMax(/* args */)
say result
```

```
create result = haviVar(/* args */)
say result
```

```
create result = haviStd(/* args */)
say result
```

5. Bonnes pratiques

- Préférez ``import "std/c/csvhaving"`` en tête de fichier.
- Lancez ``afriLang check`` avant de livrer.
- Combinez avec les modules stdlib de la même catégorie.
- Voir `/stdlib/` pour le source live et les démos playground.
- Signalez les problèmes sur GitHub si une export manque.

6. Annexe — source

module csvhaving

```
function haviSum(v list number) returns number
end
```

```
function haviMean(v list number) returns number
end
```

```
function haviMin(v list number) returns number
end
```

```
function haviMax(v list number) returns number
end
```

```
function haviVar(v list number) returns number
end
```

```
function haviStd(v list number) returns number
end
```

```
function haviNorm(v list number) returns list number
end
```

```
function filterGt(col list number, threshold number) returns list number
end
end
```

English

1. Overview

AFRILANG library 'std/c/csvhaving' (tier complex, category complex). Exports 8 function(s): haviSum, haviMean, haviMin, haviMax, haviVar, haviStd, haviNorm, filterGt.

```
'import "std/c/csvhaving"' · 'use csvhaving'
```

```
- `haviSum(v list number) → number`
- `haviMean(v list number) → number`
- `haviMin(v list number) → number`
- `haviMax(v list number) → number`
- `haviVar(v list number) → number`
- `haviStd(v list number) → number`
- `haviNorm(v list number) → list number`
- `filterGt(col list number, threshold number) → list number`
```

2. Installation & import

Add the module to your program:

```
import "std/c/csvhaving"
use csvhaving
```

Tier: complex · Category: Complex modules (c/)
Advanced domains – graphs, NLP, complex networks.

3. API reference

- haviSum(v list number) → number•
haviMean(v list number) → number•
haviMin(v list number) → number•
haviMax(v list number) → number•
haviVar(v list number) → number•
haviStd(v list number) → number•
haviNorm(v list number) → list•
filterGt(col list number, threshold number) → list

4. Usage examples

```
import "std/c/csvhaving"
use csvhaving
```

```
create result = haviSum(/* args */)
say result
```

```
create result = haviMean(/* args */)
say result
```

```
create result = haviMin(/* args */)
say result
```

```
create result = haviMax(/* args */)
say result
```

```
create result = haviVar(/* args */)
say result
```

```
create result = haviStd(/* args */)
say result
```

5. Best practices

- Prefer ``import "std/c/csvhaving"`` at the top of your file.
- Run ``afrilang check`` before shipping.
- Combine with related stdlib modules from the same category.
- See `/stdlib/` for the live source and playground demos.
- Report issues on GitHub if an export is missing or undocumented.

6. Appendix — source

module csvhaving

```
function haviSum(v list number) returns number
end
```

```
function haviMean(v list number) returns number
end
```

```
function haviMin(v list number) returns number
end
```

```
function haviMax(v list number) returns number
end
```

```
function haviVar(v list number) returns number
end
```

```
function haviStd(v list number) returns number
end
```

```
function haviNorm(v list number) returns list number
end
```

```
function filterGt(col list number, threshold number) returns list number
end
end
```

Référence rapide / Quick reference

- Import : `import "std/c/csvhaving"`
- Vérification : `afrilang check`
- Documentation : <https://afrilang.dev/stdlib/std/c/csvhaving/>

Source (extrait)

```
module csvhaving

function haviSum(v list number) returns number
end

function haviMean(v list number) returns number
end

function haviMin(v list number) returns number
end

function haviMax(v list number) returns number
end

function haviVar(v list number) returns number
end
