

AFRILANG Stdlib

std/c/sigwavelet

Français. Bibliothèque AFRILANG 'std/c/sigwavelet' (niveau complex, catégorie complex). Elle expose 7 fonction(s) : waveSum, waveMean, waveMin, waveMax, waveVar, waveStd, waveNorm.

```
'import "std/c/sigwavelet"' · 'use sigwavelet'
```

```
- 'waveSum(v list number) → number' - 'waveMean(v list number) →  
number' - 'waveMin(v list number) → number' - 'waveMax(v list num-  
ber) → number' - 'waveVar(v list number) → number' - 'waveStd(v list  
number) → number' - 'waveNorm(v list number) → list number'
```

English. AFRILANG library 'std/c/sigwavelet' (tier complex, category complex). Exports 7 function(s): waveSum, waveMean, waveMin, waveMax, waveVar, waveStd, waveNorm.

```
'import "std/c/sigwavelet"' · 'use sigwavelet'
```

```
- 'waveSum(v list number) → number' - 'waveMean(v list number) →  
number' - 'waveMin(v list number) → number' - 'waveMax(v list num-  
ber) → number' - 'waveVar(v list number) → number' - 'waveStd(v list  
number) → number' - 'waveNorm(v list number) → list number'
```

1. Vue d'ensemble

Bibliothèque AFRILANG 'std/c/sigwavelet' (niveau complex, catégorie complex). Elle expose 7 fonction(s) : waveSum, waveMean, waveMin, waveMax, waveVar, waveStd, waveNorm.

```
'import "std/c/sigwavelet"' · 'use sigwavelet'
```

```
- `waveSum(v list number) → number`
- `waveMean(v list number) → number`
- `waveMin(v list number) → number`
- `waveMax(v list number) → number`
- `waveVar(v list number) → number`
- `waveStd(v list number) → number`
- `waveNorm(v list number) → list number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/c/sigwavelet"
use sigwavelet
```

Niveau : complex · Catégorie : Modules complex (c/)
Domaines avancés – graphes, NLP, réseaux complexes.

3. Référence API

- waveSum(v list number) → number•
- waveMean(v list number) → number•
- waveMin(v list number) → number•
- waveMax(v list number) → number•
- waveVar(v list number) → number•
- waveStd(v list number) → number•
- waveNorm(v list number) → list

4. Exemples d'utilisation

```
import "std/c/sigwavelet"
use sigwavelet
```

```
create result = waveSum(/* args */)
say result
```

```
create result = waveMean(/* args */)
say result
```

```
create result = waveMin(/* args */)
say result
```

```
create result = waveMax(/* args */)
say result
```

```
create result = waveVar(/* args */)
say result
```

```
create result = waveStd(/* args */)
say result
```

5. Bonnes pratiques

- Préférez ``import "std/c/sigwavelet"`` en tête de fichier.
- Lancez ``afriLang check`` avant de livrer.
- Combinez avec les modules stdlib de la même catégorie.
- Voir `/stdlib/` pour le source live et les démos playground.
- Signalez les problèmes sur GitHub si une export manque.

6. Annexe — source

module sigwavelet

```
function waveSum(v list number) returns number
end
```

```
function waveMean(v list number) returns number
end
```

```
function waveMin(v list number) returns number
end
```

```
function waveMax(v list number) returns number
end
```

```
function waveVar(v list number) returns number
end
```

```
function waveStd(v list number) returns number
end
```

```
function waveNorm(v list number) returns list number
end
end
```

English

1. Overview

AFRILANG library 'std/c/sigwavelet' (tier complex, category complex). Exports 7 function(s): waveSum, waveMean, waveMin, waveMax, waveVar, waveStd, waveNorm.

'import "std/c/sigwavelet"' · 'use sigwavelet'

```
- `waveSum(v list number) → number`
- `waveMean(v list number) → number`
- `waveMin(v list number) → number`
- `waveMax(v list number) → number`
- `waveVar(v list number) → number`
- `waveStd(v list number) → number`
- `waveNorm(v list number) → list number`
```

2. Installation & import

Add the module to your program:

```
import "std/c/sigwavelet"
use sigwavelet
```

Tier: complex · Category: Complex modules (c/)
Advanced domains – graphs, NLP, complex networks.

3. API reference

- waveSum(v list number) → number•
waveMean(v list number) → number•
waveMin(v list number) → number•
waveMax(v list number) → number•
waveVar(v list number) → number•
waveStd(v list number) → number•
waveNorm(v list number) → list

4. Usage examples

```
import "std/c/sigwavelet"
use sigwavelet
```

```
create result = waveSum(/* args */)
say result
```

```
create result = waveMean(/* args */)
say result
```

```
create result = waveMin(/* args */)
say result
```

```
create result = waveMax(/* args */)
say result
```

```
create result = waveVar(/* args */)
say result
```

```
create result = waveStd(/* args */)
say result
```

5. Best practices

- Prefer ``import "std/c/sigwavelet"`` at the top of your file.
- Run ``afrilang check`` before shipping.
- Combine with related stdlib modules from the same category.
- See `/stdlib/` for the live source and playground demos.
- Report issues on GitHub if an export is missing or undocumented.

6. Appendix — source

module sigwavelet

```
function waveSum(v list number) returns number
end
```

```
function waveMean(v list number) returns number
end
```

```
function waveMin(v list number) returns number
end
```

```
function waveMax(v list number) returns number
end
```

```
function waveVar(v list number) returns number
end
```

```
function waveStd(v list number) returns number
end
```

```
function waveNorm(v list number) returns list number
end
end
```

Référence rapide / Quick reference

- Import : `import "std/c/sigwavelet"`
- Vérification : `afrilang check`
- Documentation : <https://afrilang.dev/stdlib/std/c/sigwavelet/>

Source (extrait)

```
module sigwavelet

function waveSum(v list number) returns number
end

function waveMean(v list number) returns number
```

```
end

function waveMin(v list number) returns number
end

function waveMax(v list number) returns number
end

function waveVar(v list number) returns number
end

function waveStd(v list number) returns number
end

function waveNorm(v list number) returns list number
end
