

# AFRILANG Stdlib

## std/m/inflation2

**Français.** Bibliothèque AFRILANG 'std/m/inflation2' (niveau medium, catégorie medium). Elle expose 4 fonction(s) : inflate, deflate, realReturn, purchasingPower.

```
'import "std/m/inflation2"' · 'use inflation2'
```

```
- 'inflate(amount number, rate number, years number) → number' - 'deflate(amount number, rate number, years number) → number' - 'realReturn(nominal number, inflation number) → number' - 'purchasingPower(amount number, inflation number, years number) → number'
```

**English.** AFRILANG library 'std/m/inflation2' (tier medium, category medium). Exports 4 function(s): inflate, deflate, realReturn, purchasingPower.

```
'import "std/m/inflation2"' · 'use inflation2'
```

```
- 'inflate(amount number, rate number, years number) → number' - 'deflate(amount number, rate number, years number) → number' - 'realReturn(nominal number, inflation number) → number' - 'purchasingPower(amount number, inflation number, years number) → number'
```

## Contents

## Français

### 1. Vue d'ensemble

Bibliothèque AFRILANG 'std/m/inflation2' (niveau medium, catégorie medium). Elle expose 4 fonction(s) : `inflate`, `deflate`, `realReturn`, `purchasingPower`.

'import "std/m/inflation2"' · 'use inflation2'

```
- `inflate(amount number, rate number, years number) → number`
- `deflate(amount number, rate number, years number) → number`
- `realReturn(nominal number, inflation number) → number`
- `purchasingPower(amount number, inflation number, years number) → number`
```

### 2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/inflation2"
use inflation2
```

Niveau : medium · Catégorie : Modules medium (m/)  
Bibliothèques intermédiaires – import std/m.../

### 3. Référence API

- `inflate(amount number, rate number, years number) → number`•  
• `deflate(amount number, rate number, years number) → number`•  
• `realReturn(nominal number, inflation number) → number`•  
• `purchasingPower(amount number, inflation number, years number) → number`

### 4. Exemples d'utilisation

```
import "std/m/inflation2"
use inflation2
```

```
create result = inflate(/* args */)
say result
```

```
create result = deflate(/* args */)
say result
```

```
create result = realReturn(/* args */)
say result
```

```
create result = purchasingPower(/* args */)
say result
```

### 5. Bonnes pratiques

- Préférez ``import "std/m/inflation2"`` en tête de fichier.
- Lancez ``afirang check`` avant de livrer.
- Combinez avec les modules stdlib de la même catégorie.
- Voir `/stdlib/` pour le source live et les démos playground.
- Signalez les problèmes sur GitHub si une export manque.

## 6. Annexe — source

module inflation2

```
function inflate(amount number, rate number, years number) returns number  
end
```

```
function deflate(amount number, rate number, years number) returns number  
end
```

```
function realReturn(nominal number, inflation number) returns number  
end
```

```
function purchasingPower(amount number, inflation number, years number) returns  
  number  
end  
end
```

## English

### 1. Overview

AFRILANG library 'std/m/inflation2' (tier medium, category medium). Exports 4 function(s): inflate, deflate, realReturn, purchasingPower.

'import "std/m/inflation2"' · 'use inflation2'

```
- `inflate(amount number, rate number, years number) → number`
- `deflate(amount number, rate number, years number) → number`
- `realReturn(nominal number, inflation number) → number`
- `purchasingPower(amount number, inflation number, years number) → number`
```

### 2. Installation & import

Add the module to your program:

```
import "std/m/inflation2"
use inflation2
```

Tier: medium · Category: Medium modules (m/)  
Intermediate libraries – import std/m.../

### 3. API reference

- inflate(amount number, rate number, years number) → number•  
 deflate(amount number, rate number, years number) → number•  
 realReturn(nominal number, inflation number) → number•  
 purchasingPower(amount number, inflation number, years number) → number

### 4. Usage examples

```
import "std/m/inflation2"
use inflation2
```

```
create result = inflate(/* args */)
say result
```

```
create result = deflate(/* args */)
say result
```

```
create result = realReturn(/* args */)
say result
```

```
create result = purchasingPower(/* args */)
say result
```

### 5. Best practices

- Prefer `import "std/m/inflation2"` at the top of your file.•  
 Run `afirang check` before shipping.•  
 Combine with related stdlib modules from the same category.•  
 See /stdlib/ for the live source and playground demos.•  
 Report issues on GitHub if an export is missing or undocumented.

## 6. Appendix — source

module inflation2

```
function inflate(amount number, rate number, years number) returns number
end
```

```
function deflate(amount number, rate number, years number) returns number
end
```

```
function realReturn(nominal number, inflation number) returns number
end
```

```
function purchasingPower(amount number, inflation number, years number) returns
  number
end
end
```

## Référence rapide / Quick reference

- Import : `import "std/m/inflation2"`
- Vérification : `afrilang check`
- Documentation : <https://afrilang.dev/stdlib/std/m/inflation2/>

## Source (extrait)

```
module inflation2

function inflate(amount number, rate number, years number) returns number
end

function deflate(amount number, rate number, years number) returns number
end

function realReturn(nominal number, inflation number) returns number
end

function purchasingPower(amount number, inflation number, years number) returns
  number
end
end
```
