

AFRILANG Stdlib

std/m/listvar

Français. Bibliothèque AFRILANG 'std/m/listvar' (niveau medium, catégorie medium). Elle expose 4 fonction(s) : variance, stddev, popVariance, popStddev.

```
'import "std/m/listvar"' · 'use listvar'
```

- 'variance(v list number) → number' - 'stddev(v list number) → number'
- 'popVariance(v list number) → number' - 'popStddev(v list number) → number'

English. AFRILANG library 'std/m/listvar' (tier medium, category medium). Exports 4 function(s): variance, stddev, popVariance, popStddev.

```
'import "std/m/listvar"' · 'use listvar'
```

- 'variance(v list number) → number' - 'stddev(v list number) → number'
- 'popVariance(v list number) → number' - 'popStddev(v list number) → number'

Français

1. Vue d'ensemble

Bibliothèque AFRILANG 'std/m/listvar' (niveau medium, catégorie medium). Elle expose 4 fonction(s) : variance, stddev, popVariance, popStddev.

'import "std/m/listvar"' · 'use listvar'

```
- `variance(v list number) → number`
- `stddev(v list number) → number`
- `popVariance(v list number) → number`
- `popStddev(v list number) → number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/listvar"
use listvar
```

Niveau : medium · Catégorie : Modules medium (m/)
Bibliothèques intermédiaires – import std/m.../

3. Référence API

- variance(v list number) → number•
stddev(v list number) → number•
popVariance(v list number) → number•
popStddev(v list number) → number

4. Exemples d'utilisation

```
import "std/m/listvar"
use listvar
```

```
create result = variance(/* args */)
say result
```

```
create result = stddev(/* args */)
say result
```

```
create result = popVariance(/* args */)
say result
```

```
create result = popStddev(/* args */)
say result
```

5. Bonnes pratiques

- Préférez 'import "std/m/listvar"' en tête de fichier.
- Lancez 'afirang check' avant de livrer.
- Combinez avec les modules stdlib de la même catégorie.
- Voir /stdlib/ pour le source live et les démos playground.
- Signalez les problèmes sur GitHub si une export manque.

6. Annexe — source

module listvar

```
function variance(v list number) returns number  
end
```

```
function stddev(v list number) returns number  
end
```

```
function popVariance(v list number) returns number  
end
```

```
function popStddev(v list number) returns number  
end  
end
```

English

1. Overview

AFRILANG library 'std/m/listvar' (tier medium, category medium). Exports 4 function(s): variance, stddev, popVariance, popStddev.

'import "std/m/listvar"' · 'use listvar'

```
- `variance(v list number) → number`
- `stddev(v list number) → number`
- `popVariance(v list number) → number`
- `popStddev(v list number) → number`
```

2. Installation & import

Add the module to your program:

```
import "std/m/listvar"
use listvar
```

Tier: medium · Category: Medium modules (m/)
Intermediate libraries – import std/m.../

3. API reference

- variance(v list number) → number•
- stddev(v list number) → number•
- popVariance(v list number) → number•
- popStddev(v list number) → number

4. Usage examples

```
import "std/m/listvar"
use listvar
```

```
create result = variance(/* args */)
say result
```

```
create result = stddev(/* args */)
say result
```

```
create result = popVariance(/* args */)
say result
```

```
create result = popStddev(/* args */)
say result
```

5. Best practices

- Prefer `import "std/m/listvar"` at the top of your file.
- Run `afri-lang check` before shipping.
- Combine with related stdlib modules from the same category.
- See /stdlib/ for the live source and playground demos.
- Report issues on GitHub if an export is missing or undocumented.

6. Appendix — source

module listvar

```
function variance(v list number) returns number
end
```

```
function stddev(v list number) returns number
end
```

```
function popVariance(v list number) returns number
end
```

```
function popStddev(v list number) returns number
end
end
```

Référence rapide / Quick reference

- Import : `import "std/m/listvar"`
- Vérification : `afrilang check`
- Documentation : <https://afrilang.dev/stdlib/std/m/listvar/>

Source (extrait)

```
module listvar

function variance(v list number) returns number
end

function stddev(v list number) returns number
end

function popVariance(v list number) returns number
end

function popStddev(v list number) returns number
end
end
```
