

AFRILANG Stdlib

std/m/npv2

Français. Bibliothèque AFRILANG 'std/m/npv2' (niveau medium, catégorie medium). Elle expose 4 fonction(s) : npv, npvSimple, profitability, discountedCashflow.

```
'import "std/m/npv2"' · 'use npv2'
```

```
- 'npv(rate number, cashflows list number) → number' - 'npvSimple(rate  
number, initial number, returns list number) → number' - 'profitabil-  
ity(npvVal number, investment number) → number' - 'discountedCash-  
flow(cf number, rate number, period number) → number'
```

English.

AFRILANG library 'std/m/npv2' (tier medium, category medium). Exports 4 function(s): npv, npvSimple, profitability, discountedCashflow.

```
'import "std/m/npv2"' · 'use npv2'
```

```
- 'npv(rate number, cashflows list number) → number' - 'npvSimple(rate  
number, initial number, returns list number) → number' - 'profitabil-  
ity(npvVal number, investment number) → number' - 'discountedCash-  
flow(cf number, rate number, period number) → number'
```

1. Vue d'ensemble

Bibliothèque AFRILANG 'std/m/npv2' (niveau medium, catégorie medium). Elle expose 4 fonction(s) : npv, npvSimple, profitability, discountedCashflow.

'import "std/m/npv2"' · 'use npv2'

```
- `npv(rate number, cashflows list number) → number`
- `npvSimple(rate number, initial number, returns list number) → number`
- `profitability(npvVal number, investment number) → number`
- `discountedCashflow(cf number, rate number, period number) → number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/npv2"
use npv2
```

Niveau : medium · Catégorie : Modules medium (m/)
Bibliothèques intermédiaires – import std/m.../

3. Référence API

- npv(rate number, cashflows list number) → number•
- npvSimple(rate number, initial number, returns list number) → number•
- profitability(npvVal number, investment number) → number•
- discountedCashflow(cf number, rate number, period number) → number

4. Exemples d'utilisation

```
import "std/m/npv2"
use npv2
```

```
create result = npv(/* args */)
say result
```

```
create result = npvSimple(/* args */)
say result
```

```
create result = profitability(/* args */)
say result
```

```
create result = discountedCashflow(/* args */)
say result
```

5. Bonnes pratiques

- Préférez 'import "std/m/npv2"' en tête de fichier.
- Lancez 'afirang check' avant de livrer.
- Combinez avec les modules stdlib de la même catégorie.
- Voir /stdlib/ pour le source live et les démos playground.
- Signalez les problèmes sur GitHub si une export manque.

6. Annexe — source

module npv2

```
function npv(rate number, cashflows list number) returns number  
end
```

```
function npvSimple(rate number, initial number, returns list number) returns number  
end
```

```
function profitability(npvVal number, investment number) returns number  
end
```

```
function discountedCashflow(cf number, rate number, period number) returns number  
end  
end
```

English

1. Overview

AFRILANG library 'std/m/npv2' (tier medium, category medium). Exports 4 function(s): npv, npvSimple, profitability, discountedCashflow.

```
'import "std/m/npv2"' · 'use npv2'
```

```
- `npv(rate number, cashflows list number) → number`
- `npvSimple(rate number, initial number, returns list number) → number`
- `profitability(npvVal number, investment number) → number`
- `discountedCashflow(cf number, rate number, period number) → number`
```

2. Installation & import

Add the module to your program:

```
import "std/m/npv2"
use npv2
```

Tier: medium · Category: Medium modules (m/)
Intermediate libraries – import std/m.../

3. API reference

- npv(rate number, cashflows list number) → number•
- npvSimple(rate number, initial number, returns list number) → number•
- profitability(npvVal number, investment number) → number•
- discountedCashflow(cf number, rate number, period number) → number

4. Usage examples

```
import "std/m/npv2"
use npv2
```

```
create result = npv(/* args */)
say result
```

```
create result = npvSimple(/* args */)
say result
```

```
create result = profitability(/* args */)
say result
```

```
create result = discountedCashflow(/* args */)
say result
```

5. Best practices

- Prefer `import "std/m/npv2"` at the top of your file.
- Run `afrilang check` before shipping.
- Combine with related stdlib modules from the same category.
- See /stdlib/ for the live source and playground demos.
- Report issues on GitHub if an export is missing or undocumented.

6. Appendix — source

module npv2

```
function npv(rate number, cashflows list number) returns number
end
```

```
function npvSimple(rate number, initial number, returns list number) returns number
end
```

```
function profitability(npvVal number, investment number) returns number
end
```

```
function discountedCashflow(cf number, rate number, period number) returns number
end
end
```

Référence rapide / Quick reference

- Import : `import "std/m/npv2"`
- Vérification : `afrilang check`
- Documentation : <https://afrilang.dev/stdlib/std/m/npv2/>

Source (extrait)

```
module npv2

function npv(rate number, cashflows list number) returns number
end

function npvSimple(rate number, initial number, returns list number) returns number
end

function profitability(npvVal number, investment number) returns number
end

function discountedCashflow(cf number, rate number, period number) returns number
end
end
```
