

AFRILANG Stdlib

std/m/rotN

Français. Bibliothèque AFRILANG 'std/m/rotN' (niveau medium, catégorie medium). Elle expose 4 fonction(s) : rotEncode, rotDecode, caesarShift, xorCipher.

```
'import "std/m/rotN"' · 'use rotN'
```

```
- 'rotEncode(s text, n number) → text' - 'rotDecode(s text, n number) → text' - 'caesarShift(s text, n number) → text' - 'xorCipher(s text, key text) → text'
```

English. AFRILANG library 'std/m/rotN' (tier medium, category medium). Exports 4 function(s): rotEncode, rotDecode, caesarShift, xorCipher.

```
'import "std/m/rotN"' · 'use rotN'
```

```
- 'rotEncode(s text, n number) → text' - 'rotDecode(s text, n number) → text' - 'caesarShift(s text, n number) → text' - 'xorCipher(s text, key text) → text'
```

1. Vue d'ensemble

Bibliothèque AFRILANG 'std/m/rotN' (niveau medium, catégorie medium). Elle expose 4 fonction(s) : rotEncode, rotDecode, caesarShift, xorCipher.

```
'import "std/m/rotN"' · 'use rotN'
```

```
- `rotEncode(s text, n number) → text`  
- `rotDecode(s text, n number) → text`  
- `caesarShift(s text, n number) → text`  
- `xorCipher(s text, key text) → text`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/m/rotN"  
use rotN
```

Niveau : medium · Catégorie : Modules medium (m/)
Bibliothèques intermédiaires – import std/m.../

3. Référence API

- rotEncode(s text, n number) → text•
rotDecode(s text, n number) → text•
caesarShift(s text, n number) → text•
xorCipher(s text, key text) → text

4. Exemples d'utilisation

```
import "std/m/rotN"  
use rotN
```

```
create result = rotEncode(/* args */)   
say result
```

```
create result = rotDecode(/* args */)   
say result
```

```
create result = caesarShift(/* args */)   
say result
```

```
create result = xorCipher(/* args */)   
say result
```

5. Bonnes pratiques

- Préférez `import "std/m/rotN"` en tête de fichier. •
Lancez `afirang check` avant de livrer. •
Combinez avec les modules stdlib de la même catégorie. •
Voir /stdlib/ pour le source live et les démos playground. •
Signalez les problèmes sur GitHub si une export manque.

6. Annexe — source

module rotN

```
function rotEncode(s text, n number) returns text  
end
```

```
function rotDecode(s text, n number) returns text  
end
```

```
function caesarShift(s text, n number) returns text  
end
```

```
function xorCipher(s text, key text) returns text  
end  
end
```

English

1. Overview

AFRILANG library 'std/m/rotN' (tier medium, category medium). Exports 4 function(s): rotEncode, rotDecode, caesarShift, xorCipher.

```
'import "std/m/rotN"' · 'use rotN'
```

```
- `rotEncode(s text, n number) → text`  
- `rotDecode(s text, n number) → text`  
- `caesarShift(s text, n number) → text`  
- `xorCipher(s text, key text) → text`
```

2. Installation & import

Add the module to your program:

```
import "std/m/rotN"  
use rotN
```

Tier: medium · Category: Medium modules (m/)
Intermediate libraries – import std/m.../

3. API reference

- rotEncode(s text, n number) → text•
rotDecode(s text, n number) → text•
caesarShift(s text, n number) → text•
xorCipher(s text, key text) → text

4. Usage examples

```
import "std/m/rotN"  
use rotN
```

```
create result = rotEncode(/* args */)   
say result
```

```
create result = rotDecode(/* args */)   
say result
```

```
create result = caesarShift(/* args */)   
say result
```

```
create result = xorCipher(/* args */)   
say result
```

5. Best practices

- Prefer `import "std/m/rotN"` at the top of your file. •
Run `afrilang check` before shipping. •
Combine with related stdlib modules from the same category. •
See /stdlib/ for the live source and playground demos. •
Report issues on GitHub if an export is missing or undocumented.

6. Appendix — source

module rotN

```
function rotEncode(s text, n number) returns text
end
```

```
function rotDecode(s text, n number) returns text
end
```

```
function caesarShift(s text, n number) returns text
end
```

```
function xorCipher(s text, key text) returns text
end
end
```

Référence rapide / Quick reference

- Import : `import "std/m/rotN"`
- Vérification : `afrilang check`
- Documentation : <https://afrilang.dev/stdlib/std/m/rotN/>

Source (extrait)

```
module rotN

function rotEncode(s text, n number) returns text
end

function rotDecode(s text, n number) returns text
end

function caesarShift(s text, n number) returns text
end

function xorCipher(s text, key text) returns text
end
end
```
