Contents

Français

1. Vue d'ensemble

Bibliothèque AFRILANG 'std/memory' (niveau simple, catégorie system). Elle expose 2 fonction(s) : kbFromBytes, mbFromBytes.

'import "std/memory"' · 'use memory'

```
- `kbFromBytes(b number) → number`
- `mbFromBytes(b number) → number`
```

2. Installation & import

Ajoutez le module à votre programme :

```
import "std/memory"
use memory
```

Niveau : simple · Catégorie : Système
CPU, disque, processus, environnement.

3. Référence API

- kbFromBytes(b number) → number
- mbFromBytes(b number) → number

4. Exemples d'utilisation

```
import "std/memory"
use memory
```

```
create result = kbFromBytes(/* args */)
say result
```

```
create result = mbFromBytes(/* args */)
say result
```

5. Bonnes pratiques

- Préférez `import "std/memory"` en tête de fichier.
- Lancez `afrilang check` avant de livrer.
- Combinez avec les modules stdlib de la même catégorie.
- Voir /stdlib/ pour le source live et les démos playground.
- Signalez les problèmes sur GitHub si une export manque.

6. Annexe — source

module memory

```
function kbFromBytes(b number) returns number
end
```

```
function mbFromBytes(b number) returns number
end
end
```

English

1. Overview

AFRILANG library 'std/memory' (tier simple, category system). Exports 2 function(s): kbFromBytes, mbFromBytes.

'import "std/memory"' · 'use memory'

```
- `kbFromBytes(b number) → number`
- `mbFromBytes(b number) → number`
```

2. Installation & import

Add the module to your program:

```
import "std/memory"
use memory
```

Tier: simple · Category: System
CPU, disk, processes, environment.

3. API reference

- kbFromBytes(b number) → number•
mbFromBytes(b number) → number

4. Usage examples

```
import "std/memory"
use memory
```

```
create result = kbFromBytes(/* args */)
say result
```

```
create result = mbFromBytes(/* args */)
say result
```

5. Best practices

- Prefer `import "std/memory"` at the top of your file. •
Run `afriLang check` before shipping. •
Combine with related stdlib modules from the same category. •
See /stdlib/ for the live source and playground demos. •
Report issues on GitHub if an export is missing or undocumented.

6. Appendix — source

module memory

```
function kbFromBytes(b number) returns number
end
```

```
function mbFromBytes(b number) returns number
end
end
```

Référence rapide / Quick reference

- Import : `import "std/memory"`
- Vérification : `afrilang check`
- Documentation : <https://afrilang.dev/stdlib/std/memory/>

Source (extrait)

```
module memory

function kbFromBytes(b number) returns number
end

function mbFromBytes(b number) returns number
end
end
```
